Full Stack Software Engineer (MERN)
Email: sainionwork123@gmail.com | Mobile: 9315410884

Professional Summary

Full Stack Software Engineer specializing in MERN stack with experience building scalable web applications and REST APIs. Improved backend performance by **30%** and developed systems handling **1,500+ users** and **12,000+ transactions**. Strong foundation in **Data Structures and Algorithms**, focused on writing efficient, scalable, and production-ready code.

Technical Skills

Languages	:	JavaScript (ES6+), C++, HTML5, CSS3
Frontend	:	React.js, Redux Toolkit, React Router, Bootstrap 5, Tailwind CSS, Material UI
Backend	:	Node.js, Express.js, REST APIs, JWT Authentication, RBAC
Databases	:	MongoDB, PostgreSQL, Query Optimization
Libraries	:	Socket.IO, WebRTC, Bcrypt, Jest, Redis, Razorpay, Cloudinary, Nodemailer
Core Concepts	:	Data Structures & Algorithms, Problem Solving, System Design, REST API Design, Scalability, 200+ LeetCode Problems
Tools	:	Git, Postman, VS Code, CI/CD

Experience

Full Stack Development Intern Jan 2026 – Apr 2026
GeeksforGeeks (IBM Certified)

- Built scalable **MERN stack** applications with **JWT authentication**, RBAC, and optimized **REST APIs**.
- Implemented **CI/CD pipelines** and **Jest** unit testing, improving deployment efficiency and code reliability.

Software Development Intern July 2025 – Dec 2025
Buildorz *Remote*

- Developed a peer-to-peer payment system serving **1,500+ users** and processing **12,000+ transactions**.
- Optimized backend architecture and database queries, reducing response time by **30%**.

Education

Delhi Technological University Delhi, India
Bachelor of Technology *2021 – 2025*

Projects

GFG Shopping App – E-Commerce Platform *React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Redis, Razorpay* GitHub | Live Demo

- Built full-stack e-commerce platform with **React.js**, **Redux Toolkit** + **Redux Persist**, **Tailwind CSS**, **Framer Motion**, **JWT** auth, **Cloudinary** image uploads, and **Nodemailer** notifications.
- Engineered **Node.js**/**Express.js** REST APIs with **Razorpay** payment integration, **Redis** product caching, **rate limiting**, **RBAC**, and **MongoDB** for cart, orders, and admin management.

StayNest – Property Rental Platform *Node.js, Express.js, MongoDB, Passport.js, Mapbox, Cloudinary, EJS* GitHub | Live Demo

- Built full-stack rental platform with **Passport.js** session auth, owner-based **RBAC**, **Joi** validation, **Cloudinary** image uploads, and **MongoDB** session store via **connect-mongo**.
- Integrated **Mapbox** geocoding API for property location mapping and implemented full CRUD for listings and reviews with **Express.js** RESTful routing.

ConvoMeet – Video Conferencing App *React.js, WebRTC, Socket.IO, Node.js, Express.js, MongoDB, Material UI* Live Demo

- Built real-time multi-user video conferencing with **WebRTC** (Google STUN), **Socket.IO** signaling, screen sharing, and in-call live chat using **React.js** and **Material UI**.
- Engineered **Node.js**/**Express.js** backend with **Socket.IO** room management, **Bcrypt** auth, and **MongoDB** meeting history persistence.

Certifications

MERN Full Stack (GeeksforGeeks) | Delta Full Stack (Apna College)
